AUTO SLIDING ENTRANCE GATE

Automatic gate is one of most usefully thing to use in companies, industries, colonies, collages and schools. There is some type to operate a gate such as a sliding on screw or on rack and pinion, piston operated, rotary and chain sprocket. Design is available for some type of operation and it is most costly also When installation and maintenance cost is not yet been considered.

SILENT FEATURES

- Very useful for sliding heavy gates both for residential and industrial use.
- acceleration and deceleration can be adjusted at the beginning and end of each opening and closing
- the frontal manual release lever allows the user to manually handle the gate in case of emergency during sudden electrical black out

Auto Sliding Curve Gate

Telescopic Sliding Gate 2 Leaf

Auto Swing Gate

Telescopic Sliding Gate 3 Leaf

Residential Entrance Gate | Commercial Entrance Gate | Industrial Entrance Gate

AUTOMATIC BOOM BARRIER

SILENT FEATURES

- Intelligent Control Panel / Low Noise / Low Power / Geared Motor / Remote Control / Heavy Duty Double Spring
- Safe Manual / Operation on Power Fail / Outdoor Use

SPECIFICATION PAPERMETER

Boom Size	< 6 MT
Frequency	50 Hz
Net Weight	60 Kg
Open Time	1~6 sec
Voltage	Geared (Electro Mechanical)
	220v + 10%
Controller	Microprocessor Based
Motor Load	120 W
	Water Proof
Other Accessories	Remote Controller x 2 no.s & Clutch Keys for Manual Operation
Aluminium Boom	Upto 6 meter Boom Aluminium Covered with Wood inside with support
Interface	RS 485
Boom Motion Control	By balanced Spring System
Boom Movement	Left/Right side (Inter Changeable)
Remote Distance	< 30 MT
Body Color	Yellow / Orange / Grey
Boom Color	White with RED Radium Strips
Optional	RS. 485 to RS 232 Convertor
Optional	Photo Cell

ACCESSORIES

UHF Reader

Loop Detector

Push Button

Safety Sensors

PVC STRIP CURTAIN

BENEFITS OF PVC STRIPS CURTAINS :

- Retaining Heat, or chilled air
- Improving workplace safety
- Clear so they allow natural light to pass through
- Reducing or containing noise levels
- helping to exclude birds
- Application Areas

Manufacturing Plants, Hotel & Kitchen Area Cold Storage Dairy Industry, Pharmaceutical Industries, Freeze Zone, Packaging Industries Processing of Agricultural Products, Factories, Warehouses.

AUTO SCRUBBER DRYER

Auto Scrubber Dryers increases the cleaning efficiency to optimize results, It is designed for easy maneuverability & ease of maintenance, It can be used with different types of brushes & Pads for different applications making it a versatile machine. It is an ideal machine for large areas like factories, shopping Complexes, Hospitals, Airports, Railway Station, Educational Institutions, Hotels, Industrial Kitchen, Club Houses etc.

BENEFITS SCRUBBER DRYER

- Compact & easy to use
- Excellent for heavy duty cleaning.
- Ergonomic Design for Greater Visibility.
- Greater Brush pressure for faster soil removal and cleaning.
- Self explanatory panels for operator understanding.
- Easy lifting mechanism for brush & squeegee.
- Spring loading brush travels with the contour of the floor.
- Automatic vacuum shut-off when recovery tank is full to protect vacuum motor.

HIGH-SPEED PVC RAPID ROLL UP DOOR

For a forklift or transport yard, you will recognise the need for a rapid roller shutter door. Where efficiency, speed and reliability are imperative, these type high speed roll up doors offer the ideal solution for your workspace. With a speed from as little as 1 second per 1000mm to open or close, these doors can quickly minimise the loss of heat and restrict sound flow. Where keeping heat and noise in or out is critical, our Rapid Roller shutter doors are ideal. There is no compromise with either security or aesthetics. Suitable for both commercial and industrial environments these doors can be delivered and installed in most sizes and finishes. It should be noted that because of their nature, these doors are only available as an electric option.

IDEAL USES / APPLICATIONS

- Warehouses
- Loading bays
- Anywhere where there is a need for climate control such as the food processing, chemical and pharmaceutical industries, or a greater need for security.

SILENT FEATURES

- Specially designed fabric door for indoor applications requiring high frequency of operations.
- Speed adjustment ranging from 0.8m/sec to 1.5m/sec via variable frequency converter which also helps in soft starting & soft stopping of the door.
- Newly designed types of side guides incorporating wind hooks to hold higher wind velocity
- Tailor made fabric justifying the industrial requirements
- Various accessories available as per application

AUTO SECTIONAL DOOR / GARAGE DOOR

We are one of the renowned manufacturers and suppliers of a qualitative assortment of Sectional Overhead Sliding Doors. These products are offered in various specifications and details provided by the customers. To stand tall on the expectations and demands of the customer, we ensure to deliver these products in a stipulated time frame.

SILENT FEATURES

- Specially designed fabric door for indoor applications requiring high frequency of operations.
- Speed adjustment ranging from 0.8m/sec to 1.5m/sec via variable frequency converter which also helps in soft starting & soft stopping of the door.
- Newly designed types of side guides incorporating wind hooks to hold higher wind velocity
- Tailor made fabric justifying the industrial requirements
- Various accessories available as per application

AUTO ROLLING SHUTTER

The most popular and widely used amongst all the categories of doors is the Transparent Rolling Shutter. The symbolic feature of our Transparent Rolling Shutter is its robust structure obtained due to the use of high strength metals in the making of slate and guide profile.

SILENT FEATURES

- Easy and fast installation
- Available in galvanized / S.S. / Aluminium / MS sheet Materials.
- Full protection for inside glass
- Motor protected with internal thermal switch
- Suitable for new and existing shutters
- Smart control operated by remote

INDUSTRIAL DOCK LEVELER

Maruti Automation offers complete logistics solutions : Dock Levelers, Dock Houses. As all components for your loading bay are available from single source.

Model	Platform width	Platform Length	Lip Length
2000 x 2500	2000	2500	360 / 430
2000 x 3000	2000	3000	360 / 430
2200 x 2500	2200	2500	360 / 430
2200 x 3000	2200	3000	360 / 430

Dock Levelers allow quick and safe loading and unloading of goods from the vehicles thus minimizing energy use, saving on heating and cooling costs resulting in maintaining high quality of the transported goods.

RISING BOLLARD

The Automatic Rising Bollard is a retractable bollard, hydraulically powered barricade which has a lift height of 600mm. Automatic Rising Bollards provide automated heavy-duty vehicle access control and protection against ram-raiding. These units bridge the gap between Automatic Barriers and Road Blockers in terms of security and cost. 100% duty rating – Automatic Bollards are designed for continuous and frequent use. Power requirement is supplied from a single phase 230v supply. The Automatic Rising Bollards can be interfaced to any access control systems. Traffic Light System included as standard on all automatic bollard systems.

WE PROVIDE FOLLOWING PRODUCT

Single Disc Floor Scrubber

Wet & Dry Vacuum Cleaner

Electromagnetic Locks

UHF Reader

Biometric / Time Attendance System

Air Curtains
